

## TW2. Treatment capacities: a new sizing pattern

### Mr. Jean-François BIGOT, major project director - Séché Environment

As a specialist in waste recovery and treatment, Séché Environnement delivers solutions for balancing business activities, industrial development and protecting resources and biodiversity. The Group's businesses deployed around two areas of strategic focus: extracting resources from waste and producing energy and securing and managing the potential nuisances of final waste. For several years, Séché Environnement has adhered to the UN Global Compact and its Sustainable Development Charter, including the 7 major commitments that serve as guidelines.

### Mr. Roberto CAVALLO, president - Erica soc. Coop.

The organization, formed as a cooperative, was started in 1996 following the tragic flooding in the region of Southern Piemonte in 1994, with the aim of working on environmental causes, both in terms communication links and risk prevention, and offering public support to public and private bodies. Today the issues we primarily work on are concerned with waste management, waste analysis, environmental risk prevention and environmental sustainability.

### Mr. Marc CHEVERRY, head of prevention and waste management service - Ademe

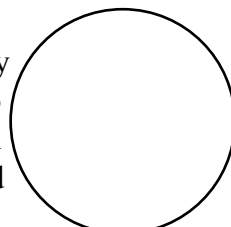

French Environment and Energy Management Agency (ADEME) is a public establishment under the joint supervision of the Ministry of Ecology and Sustainable Development, the Ministries of Industry and Research. It participates in the implementation of public policies in the fields of the environment, energy and sustainable development. The agency makes its expertise and consultancy skills available to business, local communities, public authorities and the general public and helps them to finance projects in five areas (waste management, soil preservation, energy efficiency and renewable energies, air quality and noise abatement) and to make progress with their sustainable development procedures.

### Mr. Adrien BASTIDES, waste pole manager- Amorce

AMORCE is a French national organization for local authorities created in 1987 with about fifty members. Today, it has more than seven hundred members. The aim of the organization is to allow a good energy and waste management in French local authorities in partnership with all the stakeholders. AMORCE is considered as an important network to share knowledge and good experiences thanks to the recent and relevant information it provides to his members.

AMORCE is involved in all the national discussions from prevention to waste treatment. The organization was a precursor of the « Grenelle » for environment in France.

### Mrs. Michèle GRESSUS, vice president delagated to the waste management - Nantes Métropole

The Urban Community Nantes Métropole, has been acting in the service of 590,000 inhab. of 24 municipalities in the Nantes urban area. Nantes Métropole has implemented a very ambitious waste management policy and has given itself the objective of reducing the volume of waste per resident by 5kg between now and 2014. From prevention to valorization, including collection, sorting and processing, the municipality is working on every front to turn waste into a resource.

### Mr. Christophe LIME, president - Sybert Besançon

The strategy of the SYBERT is to reduce waste, increase re-using and recycling, reduce incineration and storage in both the rural and urban environment. The SYBERT and its member councils have decided to set up a global project to respond to these issues, which contains a number of innovative solutions. For example, SYBERT signed a local Prevention Plan with the ADEME (2010-2015) and already carried out garden composting activities and an internet prevention campaign «Ménage Presque Parfait». SYBERT placed a LIFE+ project application with the European Union in July 2011. The 'WASTE ON A DIET' project concerns the whole of the zone covered by the SYBERT authority, a population of 230,000 inhabitants.
